ISES 2013 INTERNATIONAL STUDENT ENERGY SUMMIT TRONDHEIM, NORWAY, JUNE 13-15

NTNU Norwegian University of Science and Technology

Dear *Makerere University,*

I am writing to you on behalf of **International Student Energy Summit 2013 (ISES).** We would be honored to have the presence of your students at the ISES 2013 event on **June 13-15th** in **Trondheim, Norway.**

Your university was selected amongst many due to the rich background, research experience and prestige in the energy field. Therefore, your students will have the opportunity to interact with great minds from all over the world.

ISES is a global forum that focuses on sustainable resource management and the role that students will play in defining the future of energy development. We target international, multidisciplinary post secondary students in undergraduate and graduate studies interested in energy. The main goal is to inspire the current and the future generation of students to bring the change by allowing them to take part in the **Edge of Energy!**

Our last event consisted of **400 students** from more than **35 countries,** who were inspired to shape the future with their ideas. ISES has already created a vast network of driven, passionate individuals looking to make a real impact in the energy sector. "400 students from all around the world are sitting right beside me, I see courage, hope and spirit in the eyes of everyone over here. I vow at this place to my own self that I will fight the war. The war to energize the future, a war that will make the youth in the Tribal Areas to pick up pens and give up guns, a war that will enlighten not only their houses but their minds." - These are the words of Tariq Khan from Pakistan, who attended the ISES 2011 event. He now runs a business installing engineering solutions to persuading farmers in Pakistan. Helping them to install inexpensive technologies for irrigation and making energy efficient houses while training the men and women on how to apply the technology.

- ISES 2013 is expecting **500 students** from **50 different nationalities.**
- **Largest** global energy summit hosted by students for students.
- Norway is one of the **world energy leaders.**
- Trondheim city consists of 19% students, and is the Technological capitol of Norway.

In previous ISES events, we have had speakers such as:

- **Vicente Fox** (former President of Mexico)
- **Dr. Rajendra Pachauri** (Chair of Inter-Governmental Panel on Climate Change and co-winner of the 2007 Nobel Peace Prize)

To catch a glimpse of the ISES 2013 take a look at our previous ISES 2011
http://www.youtube.com/watch?v=VZNBI57Lovw

This year's event will have 50 global experts such as:

- **Prof. Bjorn Lomborg** (The Skeptical Environmentalist)
- **Dr. Pierce Riemer** (Director General, World Petroleum Council)
- **Michael Ruhle** (Head of energy Security, NATO)

What's in it for you?

- ISES has been one of the core platforms for students in order to represent not only themselves, but also their **universities.**
- Universities will gain an international platform among a **worldwide** energy summit, which will create links and networks that will last for a lifetime.

- Our Founding Partners, **Shell** and **Statkraft** have been greatly involved and will play a key role during the summit.
- Speakers and delegates will discuss how stakeholders in our global energy system can overcome challenges such as **climate changes** and **rise in energy demand.**
- As an ISES 2013 student delegate, he/she will have the opportunity to network with other energy leaders, and hear the thoughts of **top industry experts, researchers and government officials.**

We hope to see your best minds in Trondheim, June 2013!
