Rationale/Course Description

Plan surveying and profiles are common features in building and setting out of different services. Whereas this is usually executed by surveyors, other participants in the construction need to appreciate the basic concepts that feed into their areas of interest. This is covered by this course.

Objectives/Aims

- To provide understanding of graphical and spatial concepts and skills of plane surveying in construction.
- To impart problem solving skills in relation to practical surveying problems.
- To equip the students with group work and technical report writing skills.
