45	0	00	60	100	60	40	3

Rationale

This course discussed advanced concepts in power systems engineering including the recent research topics

Course Objectives

To address the most recent developments in power systems engineering as well as address other promising research and commercial power systems technologies and energy challenges

Detailed Course Content:

Any new technologies that may not have been known at the time of publication of this syllabus

Method of Teaching /Delivery

The course will be taught by using lectures, tutorials and assignments.

Mode of Assessment

Assignments, tests and final examination. Their relative contributions to the final grade are :

Requirement	Percentage contribution
Course work (Assignments, tests)	40%
Final examination	60%
Total	100%
